

## 2014 ConocoPhillips Science Experience Video Transcript

1.10 (Two girls, talking to the camera)

Girl 1: "We both want to be doctor's, to study medicine"

Girl 2: "...to be a paediatric doctor."

1.16 (Two boys, talking to the camera)

Boy 1: "I want to be a writer, maybe the news maybe. Definitely want to write novels. I've got a lot of ideas so far."

2.16 (Two boys, talking to the camera again)

Boy 2: "Mine would probably have to be when we went to the LNG gas plant at ConocoPhillips. It was really practical, we were climbing on top of all the gas towers, seeing what the machinery is, how it is being built and I think that was probably the best part of these three days."

Boy 1: "I think my one was Sports Science. I like it because it shows you both to be healthy through life and exercise and all that other stuff. It shows you all those attributes in sports, like strength, perception, agility, all the cool things."

2.54 (Two different girls talking to the camera)

Girl 3: I think going into the medicine area and sitting through one of the sort of lecture's they had and explained what they did, that was interesting and the Pharmacy and the Biology lab, where we got to look at the pond water and the left litter, that was interesting.
